

Intelligent Storage Unlocks Data's Potential for Digital Transformation

Enable Deep Data Insights and Accelerate Performance With AI

Escalating demand for digital transformation is reshaping organizations at their core, as cloud computing becomes necessary to effectively manage complex infrastructures and an endless influx of data that needs analysis. Storage solutions from Hewlett Packard Enterprise are enabling businesses to harness the power of the cloud while maintaining crucial on-premises control to accelerate development cycles, adapt to changing demands in real time, explore valuable data insights, align usage to economic needs, and position funds in the right places for seamless growth and business continuity.

HPE Nimble Storage Supported by Intelligence

- Scale up and out
- Quality of service
- Lower TCO
- Always-on data services
- Absolute resiliency
- More usable capacity

In an app-driven world, HPE Nimble Storage can eliminate the gaps with a 99.9999% availability guarantee¹ and more data per raw TB of flash storage than other all-flash arrays.² Powered by the intelligence of HPE InfoSight, HPE Nimble Storage can transform your storage into a system that can manage itself — so you don't have to.

HPE InfoSight: Intelligent IT for Self-Optimizing Storage

86% of issues automatically predicted and resolved

85% less time spent managing problems

54% of problems resolved are beyond storage³

Artificial intelligence (AI) is helping relieve the weight of managing infrastructure, using predictive analytics to help prevent issues and remedy problems before they affect your network. The HPE InfoSight platform brings intelligence to the data center to help handle workloads with these capabilities:

- **Cloud-based machine learning** that drives global intelligence and insights across servers, storage, and virtualized environments
- **AI-driven telemetry** that develops understanding and drives support for the ideal operating environment for every workload and application
- **Predictive analytics** that prevents problems through the recognition of underlying patterns and configurations within each system to isolate and remedy unauthorized changes

The benefits of HPE Nimble Storage powered by HPE InfoSight go beyond these capabilities to create a direct and advantageous financial impact.

79% lower storage operational expenses

73% fewer trouble tickets in the environment

85% less time spent resolving storage-related trouble tickets⁴

With millions of sensors capturing data from systems and subsystems, HPE InfoSight can reach beyond the limits of your IT team and tools to deliver progressively smarter results for the lifetime of your storage.

Tackle Complex Challenges and Unexpected Issues

End disruptions across all your applications

Optimize ever-changing workloads

Stop firefighting and take control

Build an Intelligent Data Strategy

Cloud-based intelligence offers the hybrid, flexible, as-a-service experience that customers expect and businesses trust. The HPE Intelligent Data Platform brings storage into a new era of data accessibility, agility, and scalability that knows no limits. Fearlessly face challenges such as:

- Overprovisioning and underutilization
- Unusable data or inaccessible insights
- Infrastructure complexity
- Operational silos

Intelligence provides the key to unlocking data insights to achieve better business outcomes. Intelligent storage solutions from HPE help you:

- Resolve issues automatically and before they impact application performance and availability
- Manage primary, secondary, big data, dev/test, backups, and cloud workloads efficiently
- Organize and optimize data for each stage of its lifecycle, including backup copies
- Make sense of massive data sets for business value, competitive advantage, and insights

Enterprises today need an intelligent data strategy. Data provides valuable business insights to power your apps, optimize your workloads, elevate your customer experience, open new revenue streams, and increase business value. What was once out of reach is now effortless with intelligent storage from HPE.

Delivering Integrated IT Solutions

Delivering for our customer's vision of their enterprise technology future since 2003. Corbel Solutions combines the subject matter expertise and accountability to deliver the technology of today in order to build the businesses of tomorrow. Partnered with Hewlett Packard Enterprise, the solutions we develop for compute, networking, storage, security, analytics, and hybrid cloud deliver immediate value and the flexibility needed for competition in the future.
